

**Tests 1 and 2 of Problem 1b are on the picture to the right:**

- In **Test 1** (on the **left**-hand-side of the picture):
  - The given **point** is at (60, 50)
  - The given **width** and **height** are 100 and 150, respectively.
  - The given **color** is **pink**
- In **Test 2** (on the **right**-hand-side of the picture):
  - The given **point** is at (200, 100)
  - The given **width** and **height** are 200 and 100, respectively
  - The given **color** is **black**
  - I have drawn a WHITE dashed line to indicate what the HEIGHT of an ellipse signifies, and a PURPLE dashed line to indicate what the WIDTH of an ellipse signifies. You are NOT to draw the dashed lines; they are there just to help you understand “width” and “height” of an ellipse.

**Test 3 of Problem 1b is on the picture to the right:**

- In **Test 3**:
  - The given **point** is at (100, 50)
  - The given **width** and **height** are 150 and 150, respectively
  - The given **color** is **purple**
